

06th February 2020

2019-nCoV (Wuhan Coronavirus) update from ESCATEC

Dear Customer,

We have implemented several measures to mitigate any risks to employee's health and the supply of products due to the current 2019-nCoV outbreak in China and its spread to other countries. These measures are summarised below for your information.

1. Employee Health

All employees are now required to:

- i. not to come to work if they have flu like symptoms until they have had a medical check.
- ii. not to come to work for 14 days after visiting China or Hong Kong or have close family members who have visited China or Hong Kong.
- iii. all business travel to China and Hong Kong is suspended and all air travel limited to essential trips. All employees travelling by air will be instructed to wear face masks in airports and on planes.

2. Supply of Materials and Components from China

We are checking our supply chain for components and materials sourced from affected regions in China to avoid or minimise any potential supply chain disruption. We will inform you if we identify any specific risks for components used in your products.

3. Visiting ESCATEC

We are implementing restrictions on visits to our factories as follows:

- i. No one who has visited China or HK in the previous 14 days will be admitted.

If you plan to visit ESCATEC please kindly note the above requirements and check any travel advice issued by your home country authorities. Please also note that Switzerland authorities have introduced some additional precautions at all airports including a ban on flights from Wuhan. The situation is developing day by day therefore please check the current advice and restrictions immediately before you plan to visit.

Yours Sincerely

Britta Blum
General Manager
