Notification to Customers and Partners of ESCATEC's Malaysian Business Units (EEM, EDM, ETM, EMM)

With reference to our previous notification to customers and partners dated 31st May 2021.

We would like to inform everyone that the Malaysian government has extended Phase 1 of the current "Movement Control Order 3.0" (MCO3.0) in Malaysia by 2 weeks, effective 15th June to 28th June 2021. The government deemed the extension necessary to further help mitigate COVID-19 cases in Malaysia.

Phase 1 of the MCO3.0 imposes several restrictions on businesses and on the ability of people to travel and socialise. Selected "essential" industries (including electronics manufacturing) are still allowed to operate with 40% of employees required to Work-from-Home at any given time and with strict adherence to official Health & Safety SOPs. **In short, there are no changes to the conditions imposed earlier by the government on electronics manufacturing.**

ESCATEC's Malaysian business units (i.e., ESCATEC Electronics, ESCATEC Medical and ESCATEC Mechatronics) will remain operational during this 2-week extension under the conditions set by the MCO3.0 and the official H&S SOPs. We continue to manage the situation to minimise any impact on customer deliveries or projects, and your Key Account Manager will contact you if we foresee any changes to our delivery or project commitments.

Please do get in touch with your ESCATEC contact in case of further questions or enquiries. All ESCATEC updates to customers and partners relating to COVID-19 can be viewed or downloaded from our website via this link: <https://www.escatec.com/en/company/covid-19-updates-for-customers-and-partners>

Yours Sincerely,

Juha Arola
Chief Operating Officer
